Dear Garden Village Resident:

Re: Precautionary Boil Water Advisory – Due to loss in pressure

The Water Treatment Plan Operators have informed us that a loss in pressure has occurred. As per the latest edition of the *Guidelines for Canadian Drinking Water Quality*, a precautionary boil water advisory is in effect until such time that two consecutive samples can be taken and tested with acceptable results.

This **Precautionary Boil Water Advisory** is effective immediately and will remain until the results of further water samples indicate that the water is safe to drink.

During this time, if you have discoloured water, run the water to flush the lines in your home. Should you have any questions on the above, please contact:

Steve Doucette
Director of Community Infrastructure
